“We have been using U.S. Ag’s products for several years now with excellent results. Last year was the first time we had used their new product C4. We used it on our corn in a side-by-side trial and the C4 treated corn did 22 bu better! This product is the best bang for the buck foliar we have ever seen!”

-Daniel, GA Farm CO OP

“I can’t tell you how happy I am to have found U.S. Ag’s product C4. After years of farming with commercial fertilizer it seems that my costs keep going up and the performance of my crops has slowly been going down. C4 has changed all of that! Since using C4, my input costs have dropped substantially and I’m growing bumper crops at the same time! Thanks to C4 I enjoy farming again!”

-John, IA Farmer

“I used C4 on my soybeans and to my surprise I didn’t need to apply any herbicide or pesticide on my crop! The soybeans look fantastic!”

-Tim, NE Farmer

“If there is one thing I know, it’s how to grow corn. I’ve been doing it for over 40 years and I’ve tried every trick under the sun to grow a better crop. With that said, I’ve never seen my corn respond to a product like C4. This stuff is simply amazing. I used two applications of C4 on my corn and it looks outstanding. Excellent plant health, huge ears, no bugs and no fungus. To top it off, C4 also saved me a bunch of cash by not having to use any pesticides! If you’ve never used this stuff you’re definitely in for a real treat!”

-Robert, KS Farmer

“I used C4 on my beans and had my best yields in over 20 years of farming this ground! When I first used this stuff at 3-leaf stage the plants had a huge growth spurt; they really put on size quick! After that first application I knew I was gonna have some big numbers on this crop if weather conditions allowed. Turns out we did have good growing conditions this year and the soybeans were fantastic! I plan to use C4 every year now!”

-Kevin, TN Famer

“U.S. Ag has made a name for itself in the agriculture field with this product. I have never seen a product perform this well, period. Ya gotta try it!”

-Jeff, CO Farmer

“C4 has been the real difference maker for me. Most years I barely get by with all the pesticides I have to buy for my crops; but since I started using C4 I haven’t had any bug or fungus problems! This stuff has saved me a fortune!”

-Gregg, KS Farmer

“I applied C4 with the second application of roundup on soybeans for several of my customers and they averaged right at 7 bu more overall. Multiply that times \$10 beans and it is a great return. Everyone was happy!”

-Commercial Applicator/Dealer, SD

“We were missing a whole month of heat units for our corn; but we still produced the best corn we have ever grown with C4!”

-SD Farmer

“My customers are all telling me how much they like C4; especially their yield increases!”

-Commercial Applicator/Dealer, NE

“We had limited water and got hailed 2 times; yet we did 196bu corn! Plus we were virtually insect and fungus free, even after the hail.”

-Terry, CO Farmer

“Our soybeans are usually poor and average 20bu acre. We had been considering selling the land. This year we used U.S. Ag’s products HA-12 and C4 and got the best yields ever! So now after an outstanding year we’re going to keep the land!!!!”

-Jared, OK Farmer

“We tripled our production for tonnage and increased cuttings with C4, Calcium and HA-12! We are very satisfied!”

-Elton, MS Grass Farmer

“This year using C4 our Corn averaged 40bu better! This is an excellent product!”

-Mark, TN Farmer

“The soybeans just exploded on C4! We saw a tremendous difference after only 1 application of C4! I was skeptical at first; but C4 is the real deal!”

-Kevin, IA Farmer

“U.S. Ag has thoroughly convinced me that there is more to farming than just NPK and how much you apply. I’ve been using traditional NPK fertilizers for over 10 years and every year I end up with the same lack-luster crop. This year U.S. Ag’s products changed all that! I used several of their products including C4 and I grew the best crop in my farming career! I didn’t use any pesticides on my ground either! Thank you U.S. Ag!”

-Nick, CO Farmer

“I used C4 on my soybeans two times and I got better yields than all my neighbors! There is a night and day difference between my field and all my neighbors. I’m simply blown away by C4!”

-James, AR Farmer

“Our soil is less than ideal for growing crops here in TX. We had tried all kinds of different products to get our soil conditions up with little success. Then when tried some of U.S. Ag’s products and they made a world of difference! There products improved our soil so much that we now grow some of the best crops in the region! Our favorite products are HA-12 and C4. You simply can’t find a better product for the money that works this well!”

-Jake, TX Farmer

“Every year we have the same ongoing battle against bugs in our fields. And every year it seems like the bugs win. Not this year... This year we found out about C4 and it turned everything around!”

-Ian, KS Farmer
